

Tax Credits for Consumers

On February 17, 2009, President Obama signed the "Stimulus Bill" (The American Recovery and Reinvestment Act of 2009) that made significant changes to the energy efficiency tax credits. These changes apply to products "placed in service" in 2009. The highlights are:

- The tax credits that were previously effective for 2009, have been extended to 2010 as well.
- The tax credit has been raised from 10% to 30%.
- The tax credits that were for a specific dollar amount (ex \$300 for a CAC), have been converted to 30% of the cost.
- The maximum credit has been raised from \$500 to \$1,500 total for the two year period (2009-2010). However, some improvements such as geothermal heat pumps, solar water heaters, and solar panels are not subject to the \$1,500 maximum.
- The \$200 cap on windows has been removed, but the requirements for windows has been increased significantly. Not all ENERGY STAR qualified windows will qualify.

Home Improvements

Tax credits now available for home improvements:

- must be "[placed in service](#)" from January 1, 2009 through December 31, 2010
- must be for taxpayer's principal residence, EXCEPT for geothermal heat pumps, solar water heaters, solar panels, and small wind energy systems (where second homes and rentals qualify)
- \$1,500 is the maximum total amount that can be claimed for all products placed in service in 2009 & 2010 for most home improvements, EXCEPT for geothermal heat pumps, solar water heaters, solar panels, fuel cells, and small wind energy systems which are not subject to this cap, and are in effect through 2016
- must have a [Manufacturer Certification Statement](#)³ to qualify
- for record keeping, save your receipts and the [Manufacturer Certification Statement](#)³
- improvements made in 2009 will be claimed on your 2009 taxes (filed by April 15, 2010) — use IRS Tax Form 5695 (2009 version) — it will be available late 2009 or early 2010
